

Buffalo Technology is Japan's #1 memory module manufacturer, with worldwide manufacturing facilities in Japan, Taiwan and Ireland and a current capacity of over 10 million modules per year. Each facility is ISO and RoHS compliant to ensure that our modules meet the most comprehensive levels of certification for quality and environmental assurance.

As an award-winning committee member for the Joint Electron Device Engineering Council (JEDEC), Buffalo is one of few manufacturers providing Gerber designs for the memory industry, which empowers Buffalo to lead the industry with future generation module designs. JEDEC Solid State Technology Association has been the foremost standards development organization of the semiconductor industry since 1958.

Experience, reputation and reliability make Buffalo products a clear choice to PC and Apple consumers, resellers, system builders and computer integrators worldwide.

Certified

Highest quality, system specific module with maximum compatibility

- *Manufactured with select Tier 1 components*
- *100% tested with major motherboards and Computer Memory Test Labs (CMTL)*
- *Direct qualification with major motherboard manufacturers*

Techworks

Designed specifically for Apple systems of today and tomorrow

- *Guaranteed compatible with Apple systems*
- *Superior quality that surpasses all Apple specifications*
- *100% tested by Apple and Buffalo for maximum reliability*

FireStix

Superior performance in gaming and over-clocking environments

- *Aluminum heat-spreader with thermally-conductive adhesive*
- *Facilitates faster memory bus speeds to eliminate bottleneck issues*
- *Exceptional performance in latest gaming motherboards*

Select

Developed for purchases based on product specifications

- *100% tested with major motherboards for optimal compatibility*
- *Built to meet Buffalo's high manufacturing standards*
- *Cost-effective without sacrificing quality*

Lifetime Warranty • RoHS Compliant • ISO 9001 & ISO14001 Compliant • Free Technical Support

About Buffalo Technology:

Buffalo Technology, Inc. is a leading global provider of award-winning networking, memory, multimedia, storage and wireless solutions for the home and business environments, as well as for system builders and integrators. With almost three decades (since 1975) of networking and computer peripheral experience leading to \$1.3 billion in revenues (FY 2005), Buffalo has proven its commitment to delivering innovative solutions that have put our company at the forefront of infrastructure technology.
