

5.4 dBi Compact Yagi Antenna - WLE-MYG

The Buffalo 5.4 dBi Compact Yagi Antenna supports 2.4 GHz 802.11g and 802.11b wireless devices to increase signal strength up to 2 times and boost wireless performance. Compact size offers the flexibility for laptop placement. Adjustable antenna face angle provides ease of installation and use. The 5.4 dBi Compact Yagi Antenna is a perfect compact antenna solution for any wireless network environment. An MC to RP-TNC connector adapter is included for use with other manufacturers' wireless devices.

Features

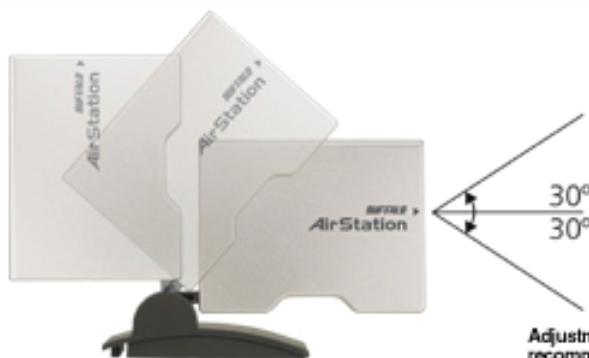

- 5.4 dBi Directional Antenna (not including cable loss)
- Compatible with 2.4 GHz 802.11g/b wireless
- Supports MC and RP-TNC interfaces, connector included
- Adjustable antenna face angle
- Compact sleek design
- Easy to install - no software required

WLE-RMC Optional Antenna Connector is required to use with WHR-G54S, WHR-HP-G54 and WLI-TX4-G54HP

Specifications

Polarization Method	Vertical or Horizontal (Horizontal during transmission)
Connector Type	MC, external MC to RP-TNC connector included
Frequency Range	2,401 - 2,484 MHz (ch. 1-11)
Total Gain	4.5 dBi including cable loss
Dimensions	4.57 x 1.42 x 3.19 in.

Adjustable Antenna Angle

Adjustment of antenna angle is recommended to improve the signal strength and boost performance.
