

Buffalo's LinkStation 520DN provides the perfect storage solution for all devices

Available memory on your cell phone is a key feature you look for when deciding on which device you will choose. This device is always with you. It holds your most recent photos, photos you have not uploaded to your computer yet and photos you haven't had the time to go through and delete yet. Some cell phone manufacturers are able to up sell for larger memory.

Some manufacturer models allow you to upgrade your memory on your own. Even when you do have the expandable memory option, running out of the space you have is always a concern.

THE BUFFALO SOLUTION

Have you ever been out of town maybe even out of the county and using your phone with its cutting edge camera to capture all of the sites you typically don't see. Do you always remember to back up the images on your phone that you have already taken? If not, you are like most of us.

Also like most of us, you have probably ran out of space on your phone while taking those pictures and are left with 2 options; take some time and delete a few pictures that you were not ready to lose or stop taking pictures. How great would it be if you had a device at home that your phone is connected to through mobile data or anywhere there is internet service? How great would it be if you were able to set your phone to always back up your images so you wouldn't have to take the time to do it?

With the LinkStation 520DN (LS520DN), you can save and stream data from your mobile device and computer anywhere with internet service. You are also able to set automatic data backups to avoid time spent backing up data yourself. The LS520DN has an incredibly friendly user interface that integrates not only to android & iphones, but also on Windows and Mac computers & tablets.

RESULTS AND NEXT STEPS

The LS520DN comes fully equipped and is ideal for storing and sharing your photos, videos, music and movie files. Key features and benefits include:

- Simple setup, right out of the box
